**CASE LAKE**

- Located in NE Ontario with year-round access, well established exploration services at Timmins and Cochrane.
- Known lithium and cesium mineralization from +15,000m of exploration drilling.
- MOU signed with Apitipi Anicinapek Nation.
- 2% NSR.

**PELLETIER**

- Located in NE Ontario 50km south of Hearst.
- Historical lithium mineralization discovered by OGS in 2003.
- Exploration planned for mid 2024.

**DECELLES**

- The Decelles property contains 669 claims, covering 38,404 hectares of LCT prospective ground near the mining centers of Val-d'Or and Rouyn-Noranda.
- Exploration planned for mid 2024.

**MAZERAC**

- The Mazerac property contains 259 claims that cover 14,700 hectares of LCT prospective ground near the mining centers of Val-d'Or and Rouyn-Noranda.
- Winsome conducted field work in 2022 on the property and identified several pegmatites.

## CASE LAKE

- The Case Lake property has 14 known pegmatite bearing domes across the tenure, to date +15,000m drilling from 2017-2024 has been completed.
- The Main zone (large red circle) hosts staked pegmatites with up to 26m thick with 1.94% Li<sub>2</sub>O & 324ppm Tantalum.
- Case Lake displays high grade lithium at Main and East, along with high grade cesium in pollucite of up to 22% at West Joe.
- Drilling is currently underway to test depth and strike extensions to these known areas.
